

It's Your Basement

Protect Your Territory

Avoid that basement smell and protect against mold and mildew.

Top reasons to invest in a WiseAire dehumidifier:

⊕ **PROTECTION**

Remove odors, prevent mold and stop mildew growth

⊕ **DURABILITY**

Designed for long life in damp basement conditions

⊕ **CONVENIENCE**

Connects to drain; no need to constantly empty water

Protect your basement and your wallet.

LESS WEAR AND TEAR

Dehumidifier cycle comparison

Standard portables need to start and stop more often to keep up with basement dampness, causing extreme wear and tear on compressors.

Brand	Capacity/Day	Seasonal Cost	Warranty	Manufactured In
WiseAire	70 pints	\$64.80	5 years	USA
Kenmore	70 pints	\$304.80	90 day limited	China
GE	70 pints	\$242.40	1 year limited	China
SoleusAir	70 pints	\$204.00	1 year limited	China

*Operating costs calculated by multiplying the average amount of actual daily run time, power consumption when running and local utility electric rate.

Model No.	Unit Size (inches) Width x Height x Depth	Capacity ¹ ppd = pints per day	Sizing ² Guidelines (ft ²)	Weight lbs	Warranty
WA-70	12.5" x 12.5" x 25"	70 ppd	2800	56	5 YEAR WARRANTY

The amount of use your unit sees is one of the major determining factors affecting how long your dehumidifier will last. Units in constant use and those improperly matched to the size of the area you're trying to treat will experience greater wear, potentially shortening their lives.

Save up to **\$189 yearly**

on your electric bills versus
using a portable dehumidifier.

RESULTING IN A LONG LASTING PRODUCT

WiseAire	Leading Portable
16.8 CYCLES DAILY	175.2 CYCLES DAILY
4,032 CYCLES SEASONALLY (8 MONTHS)	42,048 CYCLES SEASONALLY (8 MONTHS)

All products were tested concurrently in actual basement conditions; NOT a lab test chamber. These were actual real-life operating comparisons.

We recommend WiseAire high-capacity dehumidifiers for long term protection.

- + Commercial-grade construction
- + Low maintenance
- + 5-year warranty
